

02-278 oppose the weakening of the Indiana law , for the Indiana Telephone Privacy program . I oppose the federal "established business relationship" exemption on Indiana consumers. If they would like to pay my phone bill then they could have some rights to it but they don't I do. In fact I think banks & credit card companies should have restrictions on them as to the charges and interest they place on people. Again I oppose any changes to the Indiana Privacy programs, even with this there are ones who break these established rules. I have lived in Indiana my whole life and I'm against my privacy being invaded, especially when I have to pay for it. There is also an issue of households having the disabled, or illness, or trying to eat a family meal only to have to try to get to the phone for an advertisement , working different shifts and have there sleep disturbed or elderly possibly falling trying to get to a phone, has anyone ever considered these issues and yet the phone bills keep going higher!! and you want to allow more of this?
